# 6 Data Systems Interviewers Probe

Data Engineering Weekly

...and the incident each one makes you debug

leetdata.ai

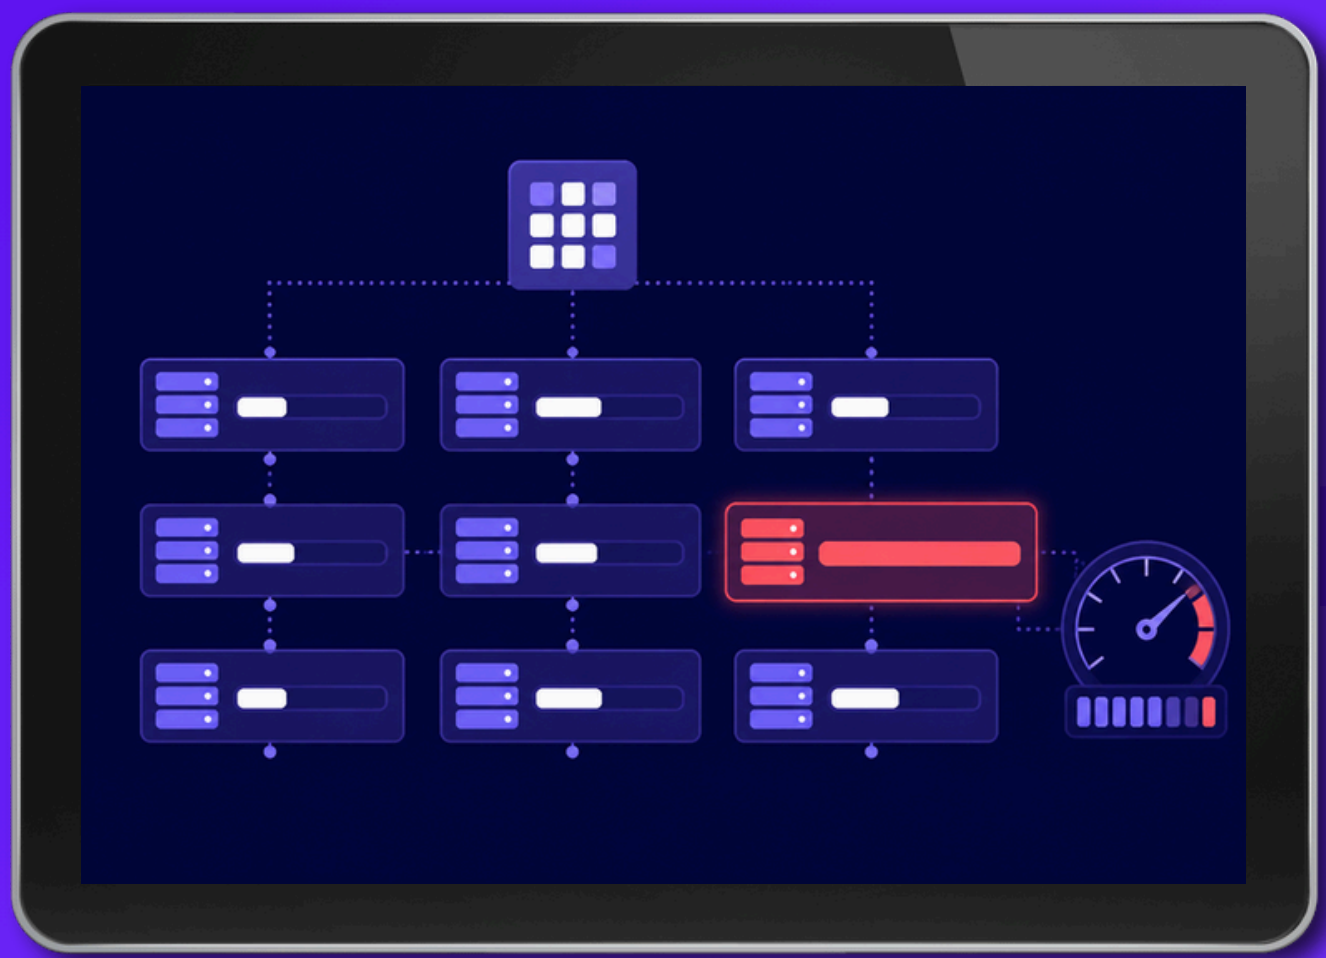

# 01 Apache Kafka

**Real Kafka incidents, so you walk in with production stories instead of definitions.**

leetdata.ai

# 02 Apache Spark

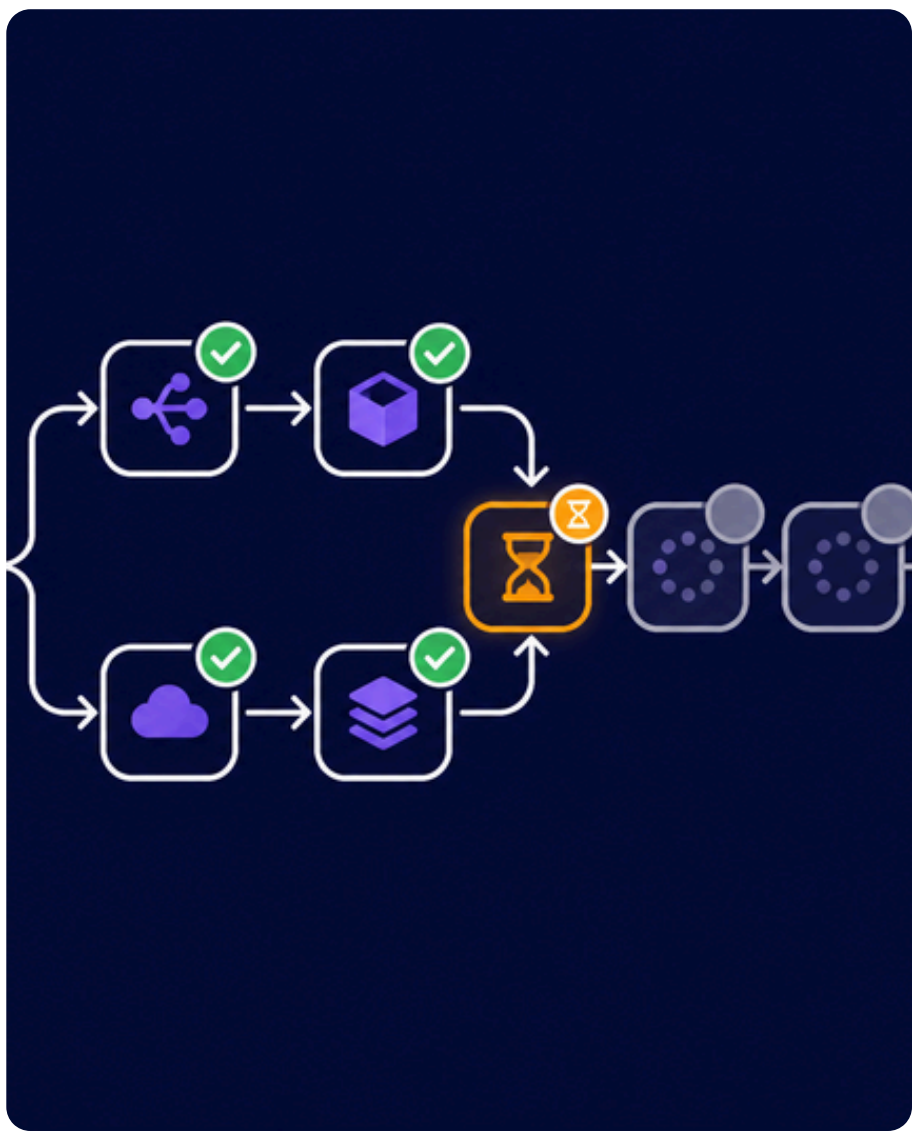

Jobs that run out of memory, skew and straggle, debugged the way interviews probe them.

leetdata.ai

# 03 Data Pipelines

## Airflow and Dagster: stuck DAGs, backfills, and idempotency under pressure.

leetdata.ai

# 04 Data Warehouse

Snowflake and BigQuery: read the query profile, fix the spill, own the bill.

leetdata.ai

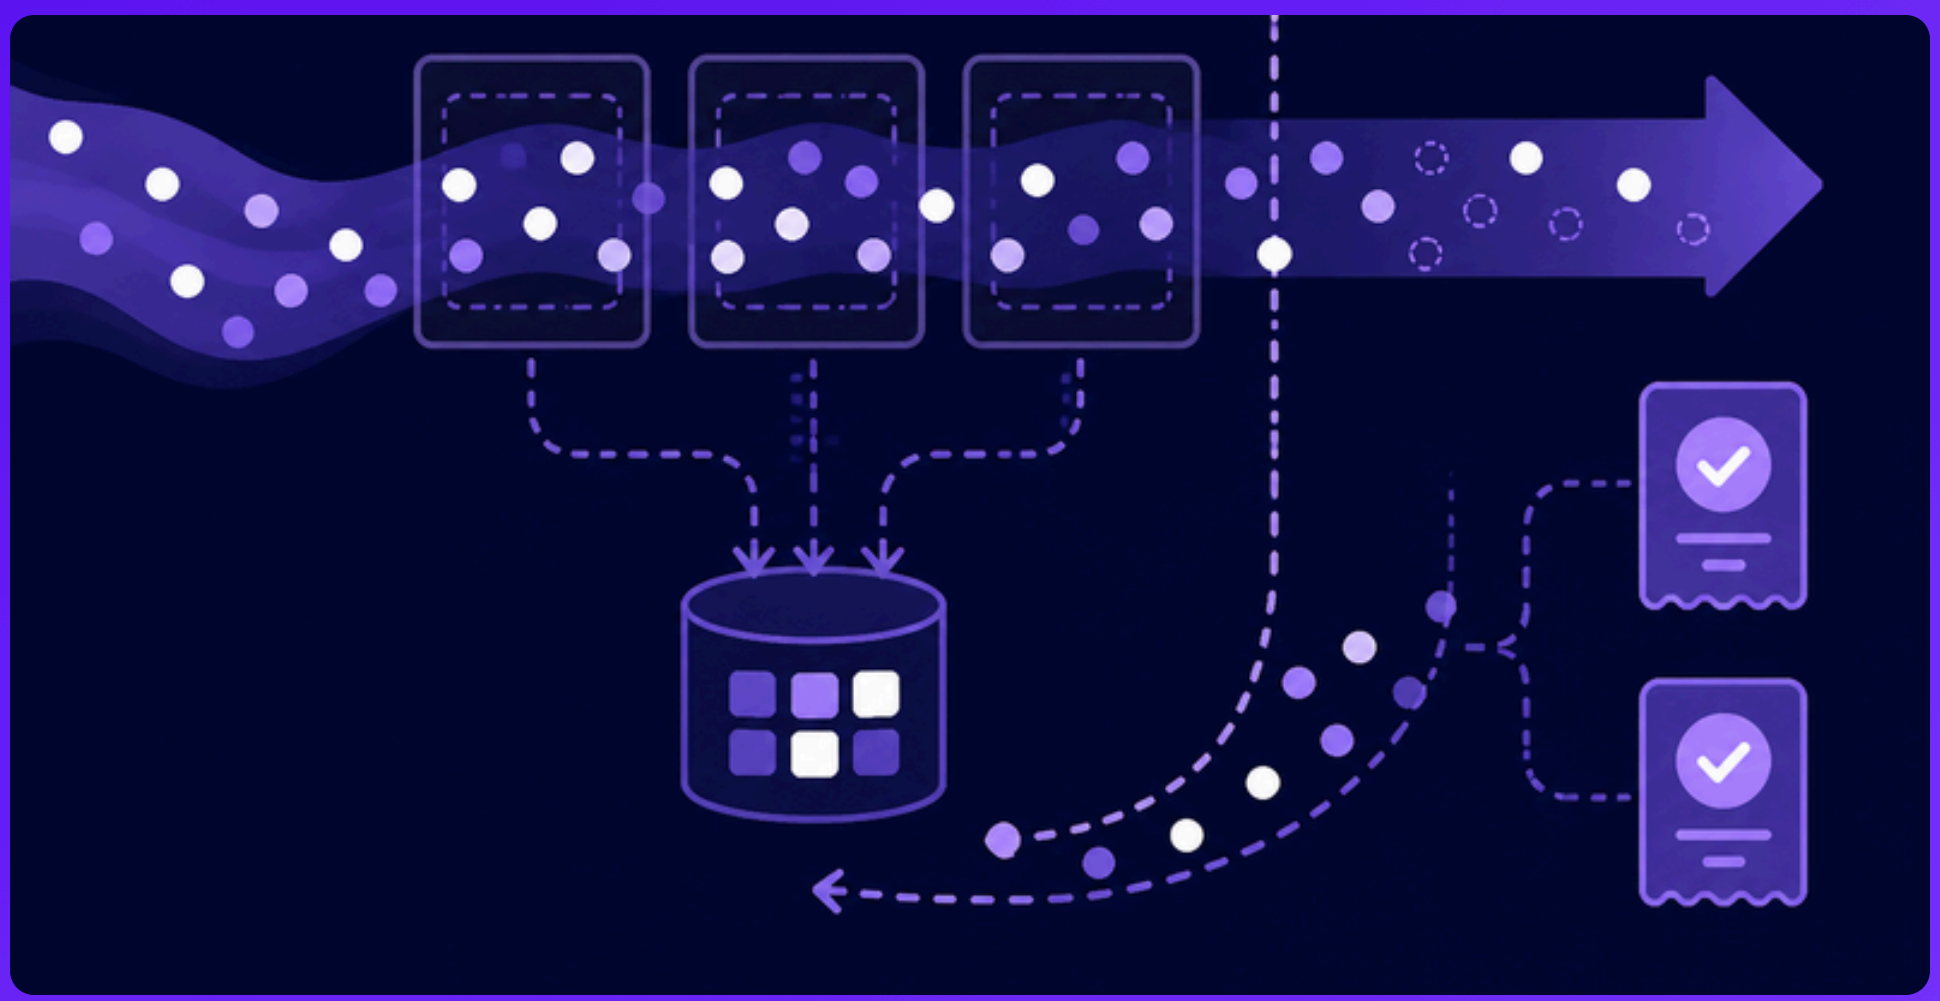

# 05 Lakehouse & Table Formats

## Iceberg, Delta and Hudi: commits, compaction, and two writers on one table.

leetdata.ai

# 06 Stream Processing

Watermarks, state, exactly-once, and the replay that double-bills.

leetdata.ai

# Pick the one in your job descriptions. Start there.

Quiz → scenarios → certificate. Junior tier is free.
